

# Art Of Life screenshots

Steve Meyfroidt, [smeyfroi@users.sourceforge.net](mailto:smeyfroi@users.sourceforge.net)

## 1 Mondrian lookalike images

A look at the default "Mondrian" image generator that can be run from the binary distribution: see the [Installation Manual](#).

## 2 Personal line drawings

A look at some experiments I'm working on, using Art Of Life as the basis for some personal work. This also shows the use of Windows Explorer's "thumbnails" view of the filesystem to preview thumbnail PNG images. It also shows several SVG files and an Adobe Illustrator file created by importing one of the SVGs for further editing.
